## INTELLIGENT VARIABLE SPEED PUMP

THE SMART CHOICE FOR SAVINGS AND ADDED SWIMMER PROTECTION

Added savings.  
Greater peace of mind.

**INTELLIPRO® VS+SVRS PUMPS—SMARTER DESIGN  
SAVES ENERGY AND MONEY. AND SO MUCH MORE.**

The pioneering design of the IntelliPro VS+SVRS Variable Speed Pump with integrated Safety Vacuum Release System (SVRS) provides an added layer of protection against entrapment. IntelliPro VS+SVRS features a built-in controller and proprietary software designed to help detect a suction or drain blockage and automatically stops the pump. The IntelliPro VS+SVRS pump complies with the current ASME A112.19.17 standard for Safety Vacuum Release Systems SVRS.\*

\*Standard for residential and commercial swimming pool, spa, hot tub and wading pool suction systems, as required by the Virginia Graeme Baker Pool and Spa Safety Act.

**ENERGY SAVINGS OF UP TO 90%\*\***

Moves water more efficiently  
at lower speeds

# This savings story has a truly happy ending.

**A POWERFUL SET OF ADVANCED FEATURES THAT  
ENABLE YOU TO SLASH PUMP-RELATED UTILITY COSTS.**

The IntelliPro® VS+SVRS Variable Speed Pump is the “intelligent” pump that can cut the pool portion of your utility bills by up to 90%\*\*, saving you hundreds of dollars per year and thousands over its life.

Traditional single-speed pool pumps are preset to operate at maximum speed, resulting in the overpowering of most water moving tasks. IntelliPro pumps can be custom programmed to match the precise motor speeds needed for functions such as filtering, heating, vacuuming, operating, spa jets, water features and more. When combined with longer pump run times, these pumps result in better water filtration and dramatically lower energy use.

# Not that you're a control freak. But you could be.

**ULTIMATE ENERGY EFFICIENCY—FULLY AUTOMATED,  
IF YOU LIKE.**

The IntelliPro VS+SVRS pump interfaces with Pentair automation systems to give you the convenience of mobile device control.†

Pair the IntelliPro VS+SVRS with a Pentair EasyTouch® or IntelliTouch® Automation System and you can schedule the exact features you wish to run...at the precise time you wish to run them. It's the ultimate in push-button convenience. For even greater control, add an optional ScreenLogic® Interface to your Pentair automation system and access your pool from practically anywhere, and at any time, using your smartphone, computer or mobile device.

\*\*Savings based on variable speed pump compared to a single-speed pump running 12 hours per day at an average of \$0.16 per kWh in a 20,000 gallon pool. Actual savings may vary based on local utility rates, pool size, pump run time, pump horsepower, pump rpm, plumbing size and length, pump model, service factor and other hydraulic factors.

† For remote access via a computer, smartphone or mobile device, users will need the ScreenLogic Interface, which is purchased separately.

## INTELLIGENT VARIABLE SPEED PUMP

Whisper-quiet operation.  
Worldwide reputation.

THE CHOICE OF POOL BUILDERS, RETAILERS  
AND SERVICE PROFESSIONALS EVERYWHERE.

Quiet means you enjoy a more relaxing, satisfying pool and spa experience, because the IntelliPro vs+svrs pump is the quietest pump on the planet. While its Totally Enclosed Fan-Cooled (TEFC) helps to reduce noise and prolong the pump life, its reliable variable speed technology allows it to operate so efficiently and quietly that at lower speeds, you might not realize it's running.

### AN ECO SELECT® BRAND PRODUCT

The IntelliPro vs+svrs pump has earned the Eco Select brand distinction as one of the "greenest" and most efficient choices from Pentair. Eco Select products are designed to help you save energy, conserve water, eliminate or reduce noise, or otherwise contribute to a more environmentally responsible equipment system.

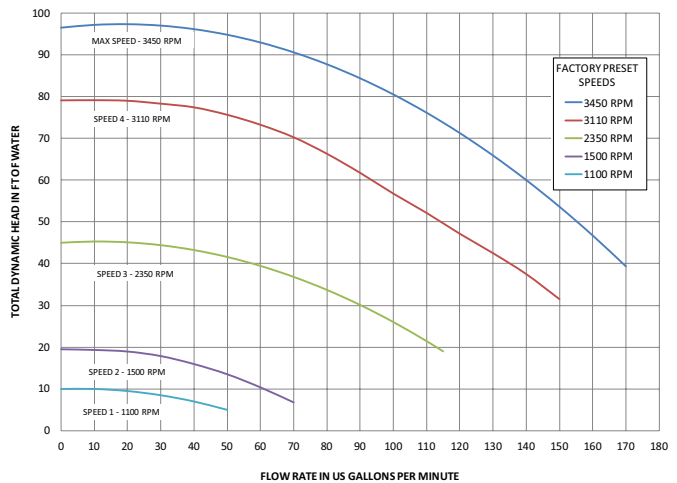

The ENERGY STAR® Certified IntelliPro vs+svrs pump from Sta-Rite meets strict energy-efficiency criteria set by the U.S. Environmental Protection Agency and the U.S. Department of Energy. This pump saves money, reduces energy use and protects the environment.
