5.2. Special Hazards Arising From the Substance or Mixture
Fire Hazard: Self-heating; may catch fire.
Explosion Hazard: Under extreme fire conditions in confined areas, large quantities of decomposing sodium hydrosulfite may produce elemental sulfur. Sulfur dust at high concentrations may create potential for explosion. If presence of sulfur dust is suspected, the recommended response is to gently apply a fog stream of water to avoid creation of a dust cloud.
Reactivity: Self-heating; may catch fire. Water reactive. Substances contained within this product may react with water producing large amounts of heat that could ignite combustible materials. Keep away from combustible materials, water, and follow applicable regulations.

5.3. Advice for Firefighters
Precautionary Measures Fire: Under fire conditions closed containers may rupture or explode.
Firefighting Instructions: Exercise caution when fighting any chemical fire.
Protection During Firefighting: Do not enter fire area without proper protective equipment, including respiratory protection.
